MISSION STATEMENT.

HEROCK® PROVIDES THE FASTEST OUT OF STOCK DELIVERY OF PREMIUM FASHIONABLE WORKWEAR. WHEREVER. WHENEVER.

People who work in a demanding environment need the right equipment to achieve an optimal performance.

HEROCK® makes sure that you always have the perfect gear for every job at your disposal, even when you're confronted with the most testing of work or weather conditions.

Our collection guarantees a complete protection without reducing your freedom to move and combines these basic principles with a design that is both classical and contemporary.

This way you're perfectly outfitted for the job at hand and guaranteed to be looking good while doing it.

HEROCKWORKWEAR.COM

WHY.

Why sustainability?

WE AT HEROCK® HAVE PURPOSELY DECIDED TO MAKE SUSTAINABILITY AN INTEGRAL PART OF OUR BUSINESS. WE FIRMLY BELIEVE THAT WE HAVE A RESPONSIBILITY TO OUR CUSTOMERS, THE ENVIRONMENT AND SOCIETY. TOGETHER WITH OUR CUSTOMERS, WE MAKE A DIFFERENCE EVERY DAY AND MAKE VALIANT EFFORTS NOT ONLY IN TERMS OF OUR ACTIVITIES BUT ALSO WITH RESPECT TO THE PROTECTION OF OUR ENVIRONMENT.

1. Protecting the environment

We are well aware of the impact the fashion and clothing industry has on the environment. By putting sustainability at the heart of our activities we aim to minimize this impact by reducing waste, using renewable and recyclable materials, minimizing our energy consumption and cutting back on our CO₂ emissions. By implementing these measures we help to protect eco systems, preserve natural resources and reduce the impact of climate change.

2. Enhanced product quality

Sustainability goes hand in hand with the creation of high-quality products. HEROCK® aims to produce sustainable workwear that will withstand demanding working conditions, will last a long time and is comfortable to wear. By investing in quality we reduce the need for frequent replacements, which extends the service life of our products and reduces the overall impact on the environment.

3. Social responsibility

We believe that good working conditions should be safeguarded, and employment rights should be respected throughout the entire supply chain. HEROCK® collaborates with manufacturers who comply with stringent ethical standards and provide honest wages and safe working conditions without the use of child labor. We believe that our responsibility does not stop with the end product but extends to the people who have contributed to its creation.

4. Customer focus

We are aware that customers are increasingly making deliberate choices and focusing on sustainable products. HEROCK® wants to meet this demand and provide its customers with workwear that is both functional and of superior quality and complies with relevant sustainability standards. We aim to be a partner for our customers, who are committed to responsible consumption, and enable them to generate positive changes through their purchasing decisions.

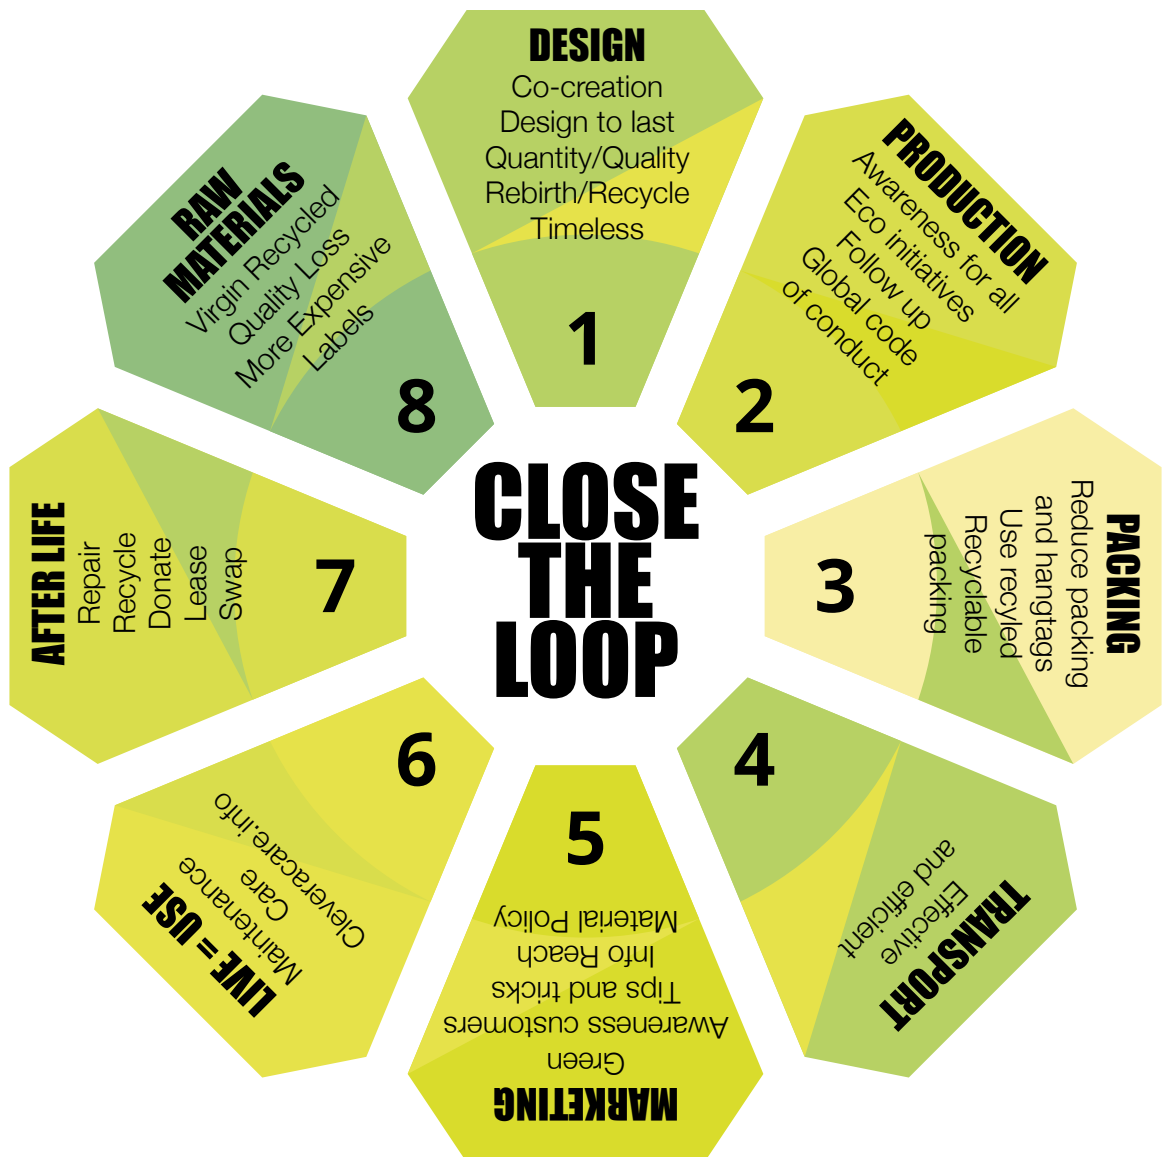

5. Innovation and focus on the future

Because we are opting for sustainability, we are able to focus on ongoing innovation and improvement. We continue to look for new ways to improve our processes, materials and products to further enhance the sustainability of our activities. We believe that sustainability is not merely a trend but the only way in which to safeguard a viable future. By being a pioneer in sustainability we hope to inspire others and generate a positive impact together.

CLOSE THE LOOP.

WE AT HEROCK® BELIEVE THAT SUSTAINABILITY IS NOT MERELY A TREND, BUT A NECESSITY TO SAFEGUARD A VIABLE FUTURE. TOGETHER WE AIM TO CREATE A WORLD IN WHICH RAW MATERIALS ARE RECYCLED, WASTE IS REDUCED AND OUR IMPACT ON THE ENVIRONMENT IS MINIMIZED. WE ARE DETERMINED TO CONTINUALLY IMPROVE OUR PRODUCTS, PROCESSES AND PARTNERSHIPS IN ORDER TO ACHIEVE THIS OBJECTIVE. WE HOPE TO INSPIRE OTHERS BY EMBRACING THE POWER OF SUSTAINABILITY AND CIRCULARITY.

At HEROCK®, we aim for a ‘Close The Loop’ sustainability flow, the solution towards a circular economy. We believe that promoting sustainability is not only our responsibility but also an opportunity to bring about positive change. By working towards a Close The Loop Sustainability Flow, we strive to reduce our environmental impact and pave the way for a circular future.

One of the key principles of ‘Close the Loop’ is the creation of a **closed loop**, in which products are recycled and reused at the end of their service life. This matches our vision perfectly.

We are convinced that **sustainable workwear** should be produced not only with due **regard for the environment** but should also be designed to have a **longer service life**. By using high quality materials and superior manufacturing techniques we aim to deliver workwear that will withstand demanding working conditions and will last longer.

Our ‘Close the Loop’ principle will ensure that our workwear is **recycled and reused** at the end of its service life rather than being consigned to the waste bin. Using innovative recycling methods we are able to recover materials such as textile fibers and metals from discarded items of clothing and reprocess them into new products. This reduces the demand for new raw materials and the impact on the environment and contributes to the **preservation of natural resources**.

We also promote awareness and create **educational programs**. We aim to inform our customers and the wider community about the benefits of a circular economy and about how they can proactively participate in closing the loop. We want to encourage them to return old workwear to us so that we can recycle and reuse it in new products. By joining forces we can have a powerful impact and make a difference in the world around us.

WE FIX THE BASICS.

Providing our own electricity using maximum numbers of solar panels on our buildings.

RENEWABLE ENERGY

Maximum container loading.

CONTAINERS

Recycled, sustainably produced materials.

FABRICS

FLEET

Electrification of our vehicle fleet.

BAGS & PACKAGING

Recycled paper rather than plastic carrier bags.

LESS AIR CARGO

Limiting air freight by increasing our stock positions.

ECOLOGIC FOOTPRINT

Limited number of production partners to promote optimum efficiency and minimize our ecological footprint.

The HEROCK® sustainability policy is based on several key basic principles. First and foremost we aim to reduce our **ecological footprint** by using sustainable materials and production methods that are less damaging to the environment. Secondly, we employ **ethical and responsible production processes**, in partnership with suppliers who comply with **stringent social and employment standards**. We also stimulate a **circular economy by recycling and reusing materials**. By implementing these basic principles HEROCK® is contributing to a more sustainable future for the workwear industry.

3-LAYER SYSTEM.

A CORRECT APPLICATION OF THIS 3-LAYER SYSTEM IS A GUARANTEE FOR AN OPTIMAL PERFORMANCE AND ALLOWS YOU TO WORK AS FREELY AND COMFORTABLY AS POSSIBLE.

An optimal protection against varying weather conditions is created by combining the right items and fabrics. They do however have to complement each other in the right way, don't just randomly throw them together. The right combination of fabrics will allow you to continue working without being bothered by the weather or your own body heat and transpiration.

1

BOTTOM LAYER

The bottom layer of your clothing has to ensure that your body heat and transpiration moisture find their way to the outside as quickly as possible. Wearing the right type of bottom layer prevents you from cooling down too quickly when you decide to take a break.

2

MIDDLE LAYER

This layer keeps you dry and warm at the same time by passing on your transpiration moisture from the bottom layer to the top layer while keeping out the cold. Fleece, for example, is an ideal fabric for this layer because it passes on moisture while insulating your body against low temperatures.

3

TOP LAYER

The main goal of the outer layer is to protect its wearer against all external conditions. Snow, rain or hail, your top layer has to keep it all out while passing on your own body heat and transpiration moisture to the outside. The ideal fabric for an outer layer is not only breathable, but also wind and waterproof.

ERGONOMICS.

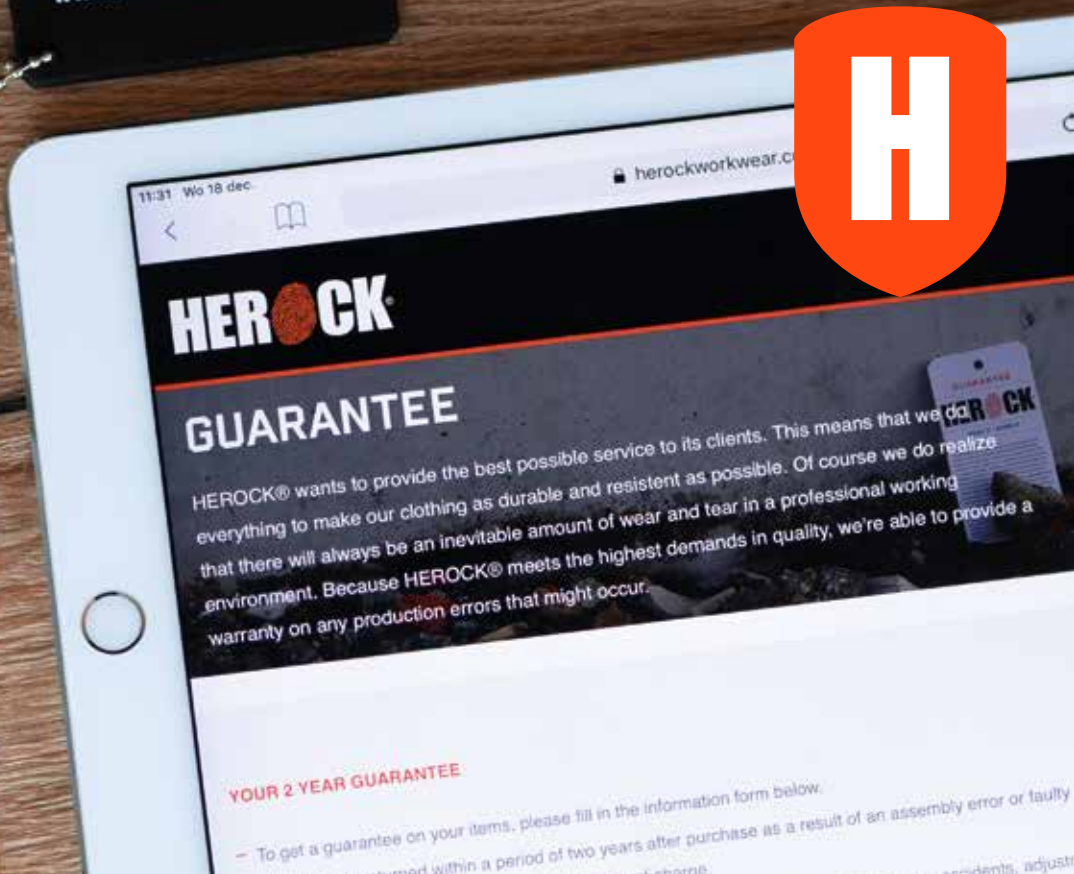

THE FIRST FUNCTION FOR EVERY ITEM IS TO PROTECT ITS WEARER AGAINST EXTERNAL FACTORS AND PHYSICAL INJURIES. HEROCK® DOES NOT JUST DESIGN ITS COLLECTIONS TO MAKE YOU LOOK GOOD WHILE YOU ARE AT WORK, WE ALREADY EXPLAINED THE PROTECTION AGAINST EXTERNAL CONDITIONS IN THE THREE LAYER SYSTEM.

However, protecting yourself against physical strain on your body by wearing the right clothes is equally important.

Carrying around heavy toolboxes, building materials and other equipment can start to weigh heavily on your physical frame. That is why our designers work hard on fortifying the crucial points in our clothing and taking a lot of pressure away from your muscles and joints. This is partly achieved by spreading out the weight of your tools and other instruments, ensuring that no part of the body is overburdened.

Our designs also ensure that you don't have to make any unnatural movements to access your equipment. We use techniques and tissues from the sport industry to make our workwear as ergonomic as possible. After all, the efforts of a craftsman are often more intense than those of real sportsmen!

2 YEAR GUARANTEE

HEROCK® PROVIDES THE BEST POSSIBLE SERVICE TO ITS CLIENTS. IT MEANS THAT WE DO EVERYTHING TO MAKE OUR CLOTHING AS DURABLE AND RESISTENT AS POSSIBLE. OF COURSE WE DO REALIZE THAT THERE WILL ALWAYS BE AN INEVITABLE AMOUNT OF WEAR AND TEAR IN A PROFESSIONAL WORKING ENVIRONMENT. HEROCK® MEETS THE HIGHEST DEMANDS IN QUALITY, WE'RE ABLE TO PROVIDE A WARRANTY ON ANY PRODUCTION ERRORS THAT MIGHT OCCUR.

DESIGN.

WE ALWAYS GO THE EXTRA MILE. IN ORDER TO PROVIDE OUR CUSTOMERS WITH THE BEST SERVICE AND PERFECT WORKWEAR, OUR RESEARCH AND DEVELOPMENT TEAM NEVER LEAVES ANYTHING TO CHANCE.

We closely monitor every step of the production, from initial design to manufacturing and so see that every product meets our high standards and those of our customers. We allow NO flaws, period.

HEROCK® continuously invests in product-improvement, based on the needs of the working hero. We always work with high-end brands and qualities such as Cordura®, YKK®, Wasa®, Pro-reforce, Coolmax®, Thermolite®, DuPont®, Sorona®, Flex 2000, Flexfit® and Meryl® Skinlife.

UNISEX.

SMALL

AVAILABLE XS

THE TIME WHEN CONSTRUCTION WORKERS AND MASONS WERE EXCLUSIVELY MEN HAS PASSED FOR QUITE A WHILE

HEROCK® is all about equality. That is why our entire collection is made for both men and women. We align every garment to the needs and wishes of a large group of working heroes, no matter what gender. You'll always find what you are looking for in the broad HEROCK® collection- workwear or accessory: a comfortable, durable and wear resistant pair of work trousers, wind resistant jackets, hats ... and, should you require a complete team wear fit- in many colours and sizes - **HEROCK® will cater to your demand.**

FROM HANDYMAN TO PROFESSIONAL.

OUR COLLECTION CAN BE DIVIDED IN THREE DIFFERENT CATEGORIES. EACH OF WHICH IS SPECIFICALLY DESIGNED TO SATISFY THE UNIQUE NEEDS AND DEMANDS OF THEIR TARGET AUDIENCE.

ESSENTIALS

This collection holds the basic needs for everybody who's eager to go to work: whether you're a professional doing your daily job or just a motivated handyman with a passion for homeimprovement, every search for the right tools begins here. The articles in this collection only carry the HEROCK® logo on the inside, which makes them perfect for adding extra prints or embroideries. Ideal if you've got a business to advertise!

ESSENTIALS

ADDITIONALS

Are you looking for an item that is designed for a specific job or needs to meet a particular demand? You will find it in the Additional collection. This collection is primarily aimed at professionals, but also the advanced handy-man will find here what he or she is looking for. The products in this line are perfect for personalisation with your company logo or a specific design.

ADDITIONALS

EXPERTS

This collection is the absolute apex of the HEROCK® arsenal: the items are specifically developed for professionals who need the absolute best. This collection contains our most exclusive items and our most enduring fabrics. The Expert collection is developed for any craftsman who would like to make the best impression on his customers.

STRETCH.

HEROCK® FABRICS WITH 2-WAY AND 4-WAY STRETCH ARE DESIGNED TO PROVIDE UNPARALLELED FLEXIBILITY AND COMFORT IN DYNAMIC WORK ENVIRONMENTS.

The 2-way stretch enhances horizontal movement, ensuring freedom of motion for tasks that require lateral flexibility. Meanwhile, the 4-way stretch extends this adaptability to vertical movements, accommodating activities that demand both up-and-down and side-to-side motion. This unique combination not only promotes agility but also maximizes durability, as HEROCK® fabrics are engineered to withstand the rigors of strenuous work while maintaining their elasticity. Whether bending, reaching, or crouching, HEROCK® stretch technology ensures that your workwear moves seamlessly with you, enhancing overall performance and comfort.

HEROCK® HYDROSHIELD

THE HEROCK® FOOTWEAR COLLECTION PROUDLY INTRODUCES THE VICTUS AND HERON SHOE, FEATURING THE CUTTING-EDGE HEROCK® HYDROSHIELD WATERPROOF MEMBRANE.

The VICTUS and HERON shoes are standing out, embodying the perfect fusion of style, durability, and performance. With the advanced HEROCK® Hydroshield waterproof membrane integrated, the VICTUS and HERON shoes take on the elements fearlessly, keeping your feet dry and comfortable in any weather. This innovative inclusion enhances both shoes, ensuring every pair delivers the confidence to tackle diverse terrains, come rain or shine. Experience the pinnacle of footwear technology with the VICTUS and HERON shoes and the unbeatable waterproof protection of the HEROCK® Hydroshield, setting new standards in outdoor safety footwear. Step into a world of reliability and sophistication, where each step is a testament to HEROCK®'s commitment to quality and innovation.

HEROCK® SAFESTEP

THE HEROCK® SAFESTEP ANTI-PERFORATION MIDSOLE SETS THE NEW FOOTWEAR STANDARD PER EN ISO 20345:2022, ENSURING A HIGHER LEVEL OF SAFETY.

Engineered with advanced materials, it provides outstanding protection against punctures and sharp objects. This innovative midsole guarantees peace of mind in challenging work environments, meeting the stringent requirements of the updated standard. The HEROCK® SAFESTEP midsole delivers durability and reliability, making it an essential component for those seeking uncompromising safety in their footwear. Step confidently into the future, knowing SAFESTEP upholds the latest industry standards, preserving both comfort and security on every stride.

HEROCK® COMFORTSTEP

**THE HEROCK® COMFORTSTEP
ERGONOMIC FOOTBED REVOLUTIONIZES
FOOTWEAR COMFORT.**

Engineered with precision, it conforms to the natural contours of the foot, providing unmatched support and cushioning. Crafted for extended wear, this footbed alleviates pressure points, promoting a comfortable experience all day long. Experience a personalized fit and enhanced foot health with the HEROCK® COMFORTSTEP footbed, setting a new standard in ergonomic design. Step into the future of comfort, where every stride embraces a level of luxury and support that only COMFORTSTEP can deliver.

TIPS FOR FINDING THE RIGHT SHOE

Always take the time when trying on your shoes. When trying them on, make certain that you can move your toes freely without having your foot fit too loosely in the shoe. Take into account that your feet tend to swell up slightly during the course of the day, so it is best to try on new shoes during the afternoon. Keep in mind in which conditions your shoes will be used for and what kind of work you will be primarily doing. Not every job requires the same footwear.

HOW MANY TYPES OF SAFETY SHOES ARE THERE?

Safety shoes low model (leather) →	Fit for people who have to kneel regularly	The foot can easily be moved inside the shoe	Achilles tendon is less protected
Safety shoes high model (leather) →	Fit for heavy duty work	Sufficient support and protection for the achilles tendon	Foot is less easily moved inside the shoe
Safety boots (leather) →	Fit for wet or humid environments	Lining is possible = fit for cold environments	Requires maintenance
Safety boots (synthetic fabric) →	Fit for wet environments and for working with chemicals*	Cheap and require low maintenance	Less isolating against cold – sensitive to heat

*Chemicals can penetrate leather

WHEN

ADVANTAGE

DISADVANTAGE

ATTENTION POINTS WHEN PURCHASING YOUR SHOES

In this diagram, you can see which type of foot protection fits best for a specific work environment.

TYPE	WORK ENVIRONMENT				
Safety shoes low model (leather) →	Orange	Grey	Grey	Grey	Grey
Safety shoes high model (leather) →	Grey	Orange	Grey	Orange	Grey
Safety boots (leather) →	Grey	Grey	Orange	Grey	Grey
Safety boots (synthetic fabric) →	Grey	Grey	Orange	Grey	Orange
	KNEELING DOWN	CLIMBING	WET ENVIRONMENT	WELDING AND SOLDERING	WORKING WITH CHEMICALS

TIPS FOR TESTING YOUR FOOTWEAR

- Choose your shoe according to the job you need it for
- When trying on new shoes, your feet have to be able to move freely and your shoe has to fit the shape of your foot. Make sure that you can place one finger behind your foot when you move your foot all the way forward
- Take your time when picking out the right shoes and remember to try them on in the afternoon since your feet swell up during the day

TOECAPS & MIDSOLES

SAFETY FOOTWEAR LIMITATIONS

In case one of the safety symbols are not indicated, the shoe will not cover these risks. All materials are prone to aging, even with the highest quality materials. Do not stock shoes longer than two years. Unfavourable stock conditions may have a bad influence on the usage time and quality.

These conditions may influence aging:

- temperature
- humidity
- changes in material composition

**FREQUENCY
IN USE,
WEAR AND
WORKING
CONDITIONS
DETERMINE
THE LIFESPAN**

200 JOULE SAFETY TOECAP

APART FROM THE DIFFERENT MIDSOLES WE DISTINGUISH THREE KINDS OF SAFETY TOECAPS. THEY ALL COMPLY WITH THE EN ISO 20345 REQUIREMENTS. THE MOST IMPORTANT REQUIREMENT IS ENERGY IMPACT RESISTANCE UP TO 200 J. THE BIGGEST DIFFERENCE IN THE SAFETY TOECAPS IS THE WEIGHT.

METAL SAFETY TOECAP

meets all requirements described under EN ISO 20345 and is also: more classic and best resistant to direct impact (although this situation is rare)

COMPOSITE SAFETY TOECAP

meets all requirements described under EN ISO 20345 and is also:

- Light compared to the standard steel toecap
- Temperature regulating (cooler in summer, warmer in winter)
- Anti-magnetic and anti-static
- Non-detectable by metal detectors

CARBON SAFETY TOECAP

meets all requirements described under EN ISO 20345 and is also:

- Ultra-light compared to the standard steel and composite toecap
- Temperature regulating (cooler in summer, warmer in winter)
- Anti-magnetic and anti-static
- Non-detectable by metal detectors

ANTISTATIC SHOES

Antistatic safety shoes and boots have a low electrical resistance between 0.1 and 1000 MegaOhm (MΩ). The use of anti-static safety footwear helps prevent a build-up of static electrical charges in the human body by sending these charges to the ground, preventing a sudden flow of electricity between electrically charged objects caused by contact. Antistatic safety footwear should not be confused with ESD (Electrostatic Discharge) footwear. Both terms refer to contact resistance but there are fundamental differences between the two! For more information about anti-static safety footwear, please read carefully our user instructions.

CARE INSTRUCTIONS TIPS & TRICKS

- Keep your safety shoes in a dry well-ventilated dark room. We advise to use two pairs of safety shoes, allowing your gear to dry.
- Clean your shoes after use with a brush or a dry cloth. Keep them well ventilated and leave them to dry (insert a piece of newspaper if needed). Do not put your shoes in direct sunlight or close to a heat source. If there is a lot of contact with water, please use a water-resistant product and follow the instructions.
- Please avoid concrete, urine, acids, chemicals... They cause tearing of leather.
- Leather shoes need to be oiled from time to time, certainly after you have dried them, in order to prevent tear. The leather will last longer and will hold its natural elasticity. Your shoes will last longer.
- End of use? Do not throw away your shoes, but donate them or recycle. Think about a second life.

STANDARDIZATION & CE-CERTIFICATES

EN ISO 13688

CE GENERAL REQUIREMENTS FOR PROTECTIVE CLOTHING

EN ISO 13688: 2013

This standard sets requirements for - among other things - safety, design and comfort of protective clothing. It also sets more requirements than the previous standard on the ageing of clothing through use, for example, but also as a result of washing. In particular, if a manufacturer claims that the clothing may be washed it must demonstrate that the protective properties of the clothing remain after the clothing has been washed the claimed number of times.

EN 343: 2003 + A1: 2007

PROTECTION AGAINST PRECIPITATION (RAIN, SNOW, MIST AND MOISTURE)

EN 343:2003 A1:2007

This European standard relates to protective clothing for rain, wind and cold in temperatures higher than -5 °C. This standard specifies the requirements and testing methods applied to materials and seams of protective clothing with regard to bad weather conditions (for instance: rain or snow, fog and damp)

IMPERMEABILITY

This factor is fundamental for superior protection. The rainwear's impermeability is determined by the garment's material. In the symbol, impermeability is indicated on the location of the X with a number between 1 and 3, where the number represents the class. Impermeability is measured by the water pressure of a water column with a determined height and a determined diameter. The height of the column determines the class.

CLASS	
1	water column of at least 80 cm height
2	water column of 80 cm to 130 cm height
3	water column of at least 130 cm height

Class 3 is the highest and the best class for impermeability

WATER VAPOUR RESISTANCE

The classic unit (g/m² per 24 hours) was easy to understand. However, the EN 343 uses a value of evaporative resistance (m². Pa/W), which is measured by the so-called 'skin model' (skin test EN11092).

Important information for a better understanding: The higher the RET value, the stronger the vapour resistance of the material; consequently, less vapour passes in case of a high RET value. The laboratory performs this static test at 35°C. Breathable clothing removes perspiration from the skin and the garment. If too much moisture accumulates in the garment, the condensation creates the impression of moist skin. In cold conditions the wearer runs the risk of cooling off quickly; in warm conditions the heart rate increases and there is a possibility of the development of thermal stress. A person feels well when the amount of perspiration produced by the body is equivalent to the amount of perspiration that is eliminated.

CLASS	
1	RET-value higher than 40
2	RET-value between 20 and 40
3	RET-value lower than 20

Class 3 is the highest and best class, more moisture can evaporate.

EN ISO 15797:2004/AC:2004

INDUSTRIAL WASH 8A

Clothing that is certified under ISO 15797 has been tested for its resistance to industrial washing and drying.

The standard specifies the test procedure for measuring the effects of industrial washing on work clothing and on its colour and durability. The clothing is tested using eight different washing procedures that simulate the influences that work clothing is exposed to during industrial washing. The clothing should be tested in a variety of ways. The preservation of the fit, wear-resistance of the seams, strength of the material, colour-fastness in relation to the colour intensity and release of colour must meet the standard.

EN ISO 20471: 2013

EN ISO 20471: 2013

HIGH VISIBILITY CLOTHING

This international standard for high-visibility clothing specifies the visibility of the user on the work floor. Everyone who works on streets, roads or building sites must wear clothing that meets the EN ISO 20471:2013 standard so the wearer is visually identifiable. The purpose of this clothing is to increase the visibility of the user both at night and during the day. Therefore, this clothing should not be covered by other outfits or have large logos printed on it that impair the reflective surface and hence the visibility. The clothing may be personalised, but this must be approved beforehand by a registered body.

You can obtain advice from your safety adviser about this. The number next to the pictogram indicates the class to which the clothing belongs, this depends on the minimum surface area of the fluorescent and reflective material:

MINIMUM SURFACE WITH VISIBLE MATERIAL M²

Class	Background material (m ²)	Reflective material (m ²)
1	0,14	0,10
2	0,50	0,13
3	0,80	0,20

The colour coordinates and the luminance factor must be within certain thresholds (before and after lighting). Requirements are also placed on the colourfastness of both the fluorescent colours and the contrasting colours. Furthermore, the clothing should have been tested by washing at least 5 times, unless specified otherwise on the clothing. The working life of the clothing not only depends on the number of times it has been washed, but also on usage, maintenance and correct storage. The clothing must be cared for correctly and it must be cleaned regularly. This is because the protective properties of the clothing are reduced when the clothing is dirty. The accompanying instructions describe how to care for the clothing. You can find the maximum number of times that the clothing can be washed next to the high visibility symbol. However, this only refers to the highvisibility property of the clothing.

WHICH CLASS TO USE AND WHEN?

CLASS 1: This class can be used in other situations by visitors who are accompanied by people wearing a

higher class of clothing. This clothing should not be used for working on public highways. A higher class must be used here, even for brief visits.

CLASS 2: this clothing can be worn during the day, provided that the weather conditions and visibility are good. It is recommended for all types of work, irrespective of the duration of the work.

CLASS 3: this clothing can be worn in the same circumstances as class 2. However, it is compulsory where visibility is limited, when work is carried out at night and in poor weather conditions.

EN 14058: 2017

PROTECTION IN COOL ENVIRONMENTS

EN 14058:2017

EN 14058 specifies requirements and test methods for the performance of garments for protection against the effects of cool environments above -5 °C. Clothing must be worn close to the body and all adaptations must be used (adjustable bottom and cuffs). There are no model specifications but the clothing needs to be adaptable in that way that upper and lower garments overlap, also when bending. Clothing must be stored in a dry place in order to maintain the thermal insulation value. These effects comprise not only low air temperatures, but also humidity and air velocity. Cold protective ensembles are excluded from this standard. The protective effects and requirements of footwear, gloves and separate head wear are excluded from the scope of this standard. The key here is to manage all layers (bottom, middle and top layer) and to make sure the clothing is closed and fits well.

EN 14404: 2004 + A1: 2010

EN 14404:2004 A 1:2010

This standard describes the test methods and requirements for knee protectors for work in a kneeling position. Our HEROCK® knee pockets are certified in combination with the HEROCK® knee protectors 21MI0901 (protection type 2). Please consult the user instructions of your trousers to check the penetration level.

There are 4 types of knee protectors	
1	'Independent' knee protectors, attached to the leg
2	Protectors designed to put in kneepockets on trousers
3	Loose knee protection
4	Knee protectors that are part of other protection

There are 3 penetration levels	
0	Knee protectors suitable to be used on a flat surface only, offering no protection against penetration. The other requirements of EN14404 are met
1	Knee protectors suitable for flat and non-flat floor surfaces and offering protection against penetration by objects < 1 cm
3	Knee protectors suitable for flat and non-flat floor surfaces and offering protection against extreme conditions (larger objects & impact)

WASHING INSTRUCTIONS

All of our clothing has been designed to optimally endure the natural elements and heavy working conditions. But even the best lasting clothes need to be treated right if you want to work in them for a long time. That's why you have to make sure that you follow the washing instructions on our packaging and inside our items closely. You can find the most important washing instructions here.

The label will give you an indication about the maximum of treatment that an item can be subjected to. The numbers give you the highest allowed temperatures in °C. If you use a limited washing program, only load up the machine halfway and make sure that you have a high liquor ratio with decreased washing and whirling motion.

WASHING

	Max 95°C. Normal process
	Max 95°C. Gentle process
	Max 60°C. Normal process
	Max 60°C. Gentle process
	Max 40°C. Normal process
	Max 40°C. Gentle process
	Max 30°C. Normal process
	Max 30°C. Gentle process
	Max 30°C. Very gentle process
	Hand wash
	Do not wash

TIPS & TRICKS

- There is no need to wash at highest temperature when the clothing is light/mildly dirty. Washing at lower temperatures is better for your clothing and the environment. Always choose the eco-washing program.
- HEROCK® clothing is- mostly- dryer safe; we recommend however to dry your clothes on an even surface (esp. with chunky knitted articles or line dry). Your clothing will last longer and this method is more environmental friendly.
- Do not iron the prints.
- You don't wear your HEROCK® clothing any longer? Donate or recycle! Don't just throw away your clothing and think about a second life.

BLEACHING

	Any bleach allowed
	Only oxygen / Non-chlorine bleach allowed
	Do not bleach

PROFESSIONAL CLEANING

	Professional drycleaning in perchloroethylene, hydrocarbons
	Professional drycleaning in perchloroethylene, hydrocarbons Gentle process

DRYING

	Tumble drying possible - normal temperature
	Tumble drying possible - low temperature
	Do not tumble dry

IRONING

	Maximum 200°C
	Maximum 150°C
	Maximum 110°C
	Do not iron

FITTING AND SIZES

B: Measure your waist at the height of your navel without trousers and measure with a tight ribbon meter

A: Measure your chest just below your armpits

C: Measure your hip width horizontally at the widest point

D: Measure your inside leg length from crotch to the floor

Wearing the correct size is not only important for catwalks. Professionals need to wear garments that allow easy movement and provide them with the (working) comfort they need. A garment that does not fit could disturb movements and lead to unsafe situations. An article that

does not fit well is more prone to wear and will have to be replaced quicker. That is why HEROCK® focuses on a perfect fit workwear collection. The pockets and other functions of our clothing are easily reachable and accessible, that may seem a detail, but it can be a big difference in the workplace.

A perfect fit is key when it comes to free and easy movement. We offer each article of our collection in every possible size. Check your measurements on the following pages and choose a size that fits best for you physique and height.

FABRICS & TREATMENT

HEROCK® MAKES USE OF THE BEST TECHNOLOGIES THAT ARE AVAILABLE TO US. THAT WAY WE CAN GUARANTEE AN OPTIMAL PROTECTION AND AN UNMATCHED CONVENIENCE WHILE DOING YOUR JOB. HERE YOU WILL FIND MORE DETAILS ON OUR MOST FREQUENTLY USED FABRICS AND TECHNOLOGIES SO YOU KNOW EXACTLY WHAT YOU ARE PURCHASING.

CORDURA®

Cordura® is a fabric that was designed by textile manufacturer Dupont. This polyamid fiber is extremely durable and strong, but very flexible at the same time. HEROCK® makes use of this extraordinary fabric to fortify crucial points in its clothing, for example on the knees, shoulders and elbows.

COOLMAX®

The Coolmax® fiber which is incorporated into the fabric, allows you to keep your body dry and cool: the specially designed fiber will pass your transpiration moisture to the layer above where it can evaporate. This fabric is even worn by professional athletes because of its unique ventilating abilities.

THERMOLITE®

The Thermolite® fiber technology delivers lightweight warmth, it traps a layer of warm air between the fabric and your skin. It is engineered to help and optimize your performance without weighing you down.

FLEXFIT®

Our Flexfit® caps are fitted with a patented technology that weaves polyurethane Spandex into the sweatband and throughout the entire crown, providing a superbly comfortable fit.

YKK®

YKK® zippers are designed by the YKK® Fastening Products Group. They are the strongest zippers in the world. We use them to add even more strength to the HEROCK® workwear.

meryl®

The ideal basis layer for the three layer system and perfectly sweat-proof. The quick-dry characteristics allow maximum comfort and keep your body warm.

FLEX 2000

This is an extra strong polyester fabric that is fortified with polyurethane, a PVC-coating and taped seams. This combination makes a 100% waterproof outside, while the inside of your clothing absorbs and passes on transpiration moisture and condensation. In other words: the ideal fabric for a long day of work under the open sky or in the rain.

PRO- REFORCE

Pro-Reforce is an innovative material that we designed to function as a protective shield. The fabric is made out of a 100% Oxford polyester material with an additional coating that does not only make your clothing dirt-repellent, but also provides extra mechanical resistance. This extremely robust and durable fabric will protect you against any possible external factor and allow you to work in all possible conditions, whether you're dealing with extreme weather or working conditions. Some items are completely manufactured using this fabric, others are fortified with Pro-Reforce in crucial points.

WASA SWEDEN

WASA SWEDEN QUALITY specializes in durable accessories. They use a high percentage of copper mixed with zinc, which makes their fasteners more solid, more easily workable and more securely attached in our clothing. As a result, our HEROCK® products become more durable.

COTTON

This material is one of the cornerstones of our collection: the material works both insulating and ventilating at the same time. In addition, cotton is a strong and enduring fiber that is still soft and comfortable to the touch.

100% PRE-SHRUNK COTTON TWILL 300G/M² WATER-REPELLENT COATING

This form-retaining variant on traditional cotton works both insulating and ventilating at the same time, which makes it perfect for use at higher temperatures. Moreover, this material will not melt when exposed to high temperatures, making it ideal for welders and technicians.

100% COTTON JERSEY PRE-SHRUNK 190G/M²

This material is made out of pre-shrunk cotton which is soft, enduring and convenient at the same time. Thanks to its texture, the fabric is perfectly suitable for the adding of a print or embroidery.

95% COTTON 5% ELASTANE PRE-SHRUNK JERSEY 200G/M²

This fabric is made of pre-shrunk cotton that is soft and comfortable. The addition of elastane makes the fabric elastic.

80% COTTON 20% POLYESTER PRE-SHRUNK JERSEY TERRY 270G/M²

Fabric made out of pre-shrunk cotton, with a somewhat rougher inside structure and a smooth outside; perfectly printable or for embroidering.

100% JEANS

This heavy and strong variant of cotton is a classic because of its extraordinary durability and multifunctionality. Denim is one of the oldest fabrics in our assortment and its place between our other fabrics is rightfully earned.

POLYESTER/COTTON

These two fibers together form a lightweight and strong fabric: the mix between polyester and cotton results into an optimal combination of durability and comfort. Thanks to its unique composition, this fabric is guaranteed to retain its shape and color, which makes it very suitable for work in demanding conditions.

65% POLYESTER

35% COTTON TWILL

WATER-REPELLENT COATING

The combination of polyester and cotton makes sure that this material is light to wear, but insulating and highly enduring at the same time. Thanks to its foldability and minimal weight, its wearer enjoys both a high freedom of movement and an unmatched comfort. Thanks to its lighter composition, this fabric is suitable to wear throughout the entire year and both colorfast and wearproof.

65% POLYESTER 35% COTTON CANVAS WATER-REPELLENT COATING

A rough, all-round polyester/cotton fabric which is soft, enduring and flexible. Fortified to retain its form and excellent comfort. The majority of HEROCK® EXPERTS' collection of functional workwear is available in this fabric.

65% POLYESTER 35% COTTON RIPSTOP 210G/M²

Sturdy, light and comfortable fabric. The ripstop construction prevents tear through.

64% COTTON 34% POLYESTER COOLMAX® 2% ELASTANE 180G/M²

Very light and pleasant elastic fabric mainly of cotton. It's a very fresh-feeling fabric with the special Coolmax® technology.

63% COTTON 12% POLYAMIDE 11% POLYESTER THERMOLITE 13% POLYESTER COOLMAX® 1% ELASTANE

This unique fabric has been developed for use throughout the entire year. The denim fabric ensures warmth and comfort without extra weight and a fresh feel in the summer. The elasticity of the fabric is very comfortable and ergonomic

70% POLYESTER 30% COTTON WITH TWILL 300G/M²

Wear-resistant and flexible fabric feeling pleasant on the skin with cotton woven on the inside. Polyester is woven into the outside of the fabric so dirt absorption is reduced.

65% POLYESTER 35% COTTON PIQUÉ 210G/M²

The combination of polyester and cotton is strong and enduring but still comfortable to wear. The material has excellent ventilating features and is therefore highly suitable

to wear as bottom or middle layer.

The HEROCK® polos are only a few of the items that are made using this material. The fabric is also colorfast and wearproof.

80% COTTON 20% POLYESTER JERSEY PRE-SHRUNK

This pre-shrunk combination of polyester and cotton makes every piece of clothing a joy to wear. Thanks to the cotton, the fabric remains soft, while the polyester ensures an increased durability and colorfastness. Its minimal weight makes this material perfect for a long day of work.

100% POLYESTER ACTI-FLEECE

This lightweight microfiber fleece fabric ensures its wearer a maximum of comfort and a minimum of heat loss. That is why this material is perfect to be worn as a middle layer for optimal insulation.

100% POLYESTER 330G/M² WINDPROOF & BREATHABLE ACTI-FLEECE

This lightweight fleece fabric guarantees its wearer a maximal insulation. Thanks to its high durability, this material can be worn as an outer layer, but its breathing features also make it perfect to wear as a middle layer for extra protection against wind and rain. This fabric is perfect for heavy duty work in harsh conditions.

SOFTSHELL

The mix of polyester and elastane ensures an excellent insulation and provides a great transport of transpiration moisture. Softshell clothing is light, water-repellent and windproof. On top of that, the material is very flexible, a feature that adds significantly to the wearer's comfort.

DECLARATION OF CONFORMITY

We guarantee that we always use the same production methods for our standardized clothing and shoes and that we always use the same materials/fabrics that were tested to reach the standardization; Upon request we can deliver all the CE-certificates. You can turn to the website for the declarations of conformity for standardized/certified clothing and shoes.

STAND OUT EVEN MORE AND HAVE ALL YOUR HEROCK® WORKWEAR CUSTOMIZED!

The items in our collection can be customized to fit the wishes of any client, whether it's a big corporation with a lot of employees or a one man company that employs a few experts. It allows you to create a personalized outfit that clearly features the logo of your business. You can even design an entire collection of your own company clothing. A real craftsman can be proud of a job well done and can rightfully take credit for his work by signing it with his own name. That's why HEROCK® always makes sure that every item of our design leaves enough space for adding an extra detail, so you can take credit for your expertise as well! Contact your HEROCK® dealer for more details regarding the customizing of our items and the technologies that are available (printing, embroidery, transfer...).

CUSTOMIZE YOUR ZIP PULLER SO YOUR HEROCK® CLOTHES LOOK MORE LIKE YOU.

TEAMWEAR

ARE YOU LOOKING FOR AN EASY WAY TO INCREASE YOUR TEAM'S PRODUCTIVITY AND HAVE YOUR TEAM STAND OUT AS A STRONG UNITY?

Look no further: here is Teamwear! By introducing Teamwear, HEROCK® does not only provide your team with a sense of connection but also allows your team to enjoy professional and state of the art workwear. At HEROCK® we develop workwear that meets every professional's needs to the smallest detail. It's all in the pocket. All HEROCK® workwear has been designed in collaboration with craftsmen from various sectors.

In order to help you with your choice, we have divided our products over 5 categories:

SHEROCK®

WOMEN'S WORKWEAR

**SHEROCK®! DESIGNED BY AND FOR WOMEN,
COMPLYING WITH THE HIGH SHEROCK® STANDARDS,
AND ADAPTED TO THE NEEDS OF HERO-WOMEN.
PERFECT FIT, HIGH QUALITY, TOTALLY SHEROCK®!**

**WE ARE THE ONES WHO BUILD YOUR HOUSES AND CITIES.
WE CONSTRUCT THE ROADS AND BRIDGES THAT CONNECT
THE ENTIRE WORLD. WE KEEP YOU SAFE AND DRY WHEN
THE SKIES FALL DOWN. WHEN SOMETHING IS BROKEN,
WE ARE THE ONES WHO FIX IT. WE STAND OUR GROUND IN
THE FACE OF STORMY WEATHER, DIZZYING HEIGHTS AND ALL
THE OTHER DANGERS THAT STAND IN OUR WAY.
WE ARE THE ONES WHO MAKE SURE THAT THE WORLD KEEPS
ON GOING ROUND AND ROUND.
WE ARE HEROES.**
